Dan will be EPA's first presenter delivering key talking points, and John will present on the temperature standard. Peter and I will be close by to address questions that may come up from the BOF on the paired watershed study and CZARA, respectively.

I have attached the BOF agenda, the directions to ODF, questions from ODF that may be asked by the BOF, and our final version of EPA's "talking points and support documents". Please let me know if you have any questions. If you need to reach me this weekend, please feel free to call me anytime at: Ex. 6 - Personal Privacy

For those of you attending the workshop, travel safely. See you Monday.
